

Blaze orange SAR field shirt

In an effort to maintain uniformity and promote professionalism we have selected the blaze orange field shirt as a recommended uniform. This shirt's main purpose will be for visibility on searches but may also be worn for any SAR field operations. The shirts can be purchased through the forager press at the following link: <http://adirondack-books.com/sargear/teamshirt.htm>

The nametapes and reverse American flags can be purchased from 1800nametape.com at the following links:

- <http://www.1800nametape.com/flags.htm> - REVERSED
- You will need one reverse flag for the right shoulder.
- <http://www.1800nametape.com/law.htm>
- You will need one tape of "SEARCH AND RESCUE" for the left chest.
- You will need one tape of your last name for your right chest.

Both tapes can be found about mid way down the page under the "Color name or branch tapes" section. Select the white lettering on navy webbed tapes.

Placement of Patches and Insignia

It is important to present a consistent and professional appearance with regard to the uniform shirt. Please adhere to the following guidelines so that the team can maintain uniformity. Members should have these patches affixed to there blaze orange Remington brand shirt as follows:

- Reverse American flag (1 7/8" by 3 1/4") patch on the wearer's right sleeve, centered and one-quarter inch below the shoulder out seam.
- Both the "SEARCH AND RESCUE" and your "LAST NAME" tapes should be 5" in length and centered above the chest pockets with the bottom edge of the tape against the pocket. SAR on the left and your last name on the right. Do not cut the nametapes to length, fold the ends under. The nametapes should also be washed before they are sewn on.
- One (1) EMS or one (1) NASAR patch may be placed in line below the reverse American flag. Only ONE (1) patch may be placed below the reverse American flag on the right shoulder.
- The left shoulder will be the team patch once it is done. Specs and placement will follow.

Please see photos below. If you have questions please contact Matt Buchko.
